TWK specialises in providing solutions to rural challenging areas and communities, be it broadband or telephone internet, local and remote PBX's and VPN's, to name but a few.

TWK consists of a dedicated and focused team cross South Africa that draws on several fields of expertise and multi-disciplinary backgrounds to change the South African Communications Technology landscape.

FTTH is the fastest possible means for transmitting data, which translates to significantly higher line speeds for all content. FTTH allows you to experience the internet the way it was meant to be; whether it is to download music, streaming a favourite TV show or movies or establishing an office from your home.

Fibre is the answer.
